

340B AUDIT MANAGEMENT

A better way to run 340B audits.

One workspace to organize evidence, coordinate your team and manage the audit from preparation through review and closeout.

Built for independent auditors, audit firms and consulting teams.

BUILT AROUND THE AUDITOR

Less time coordinating. More time auditing.

Bring scattered evidence, tasks and review decisions into a structured workflow. Keep your team aligned while professional judgment stays with the auditor.

ONE CONNECTED AUDIT WORKSPACE

Manage audits and priorities

Track engagements, assigned work and items that need attention across your audit portfolio.

Organize evidence by workstream

Keep policies, provider eligibility and contract pharmacy records connected to the audit.

Coordinate your team

Assign owners, set due dates and keep participants aligned on responsibilities and next steps.

Document review decisions

Capture auditor assessments and rationale alongside the evidence that supports them.

Track findings and remediation

Record findings, link supporting evidence and monitor corrective actions through resolution.

Get guidance as you work

Access in-workflow guidance, learning resources and reference materials throughout the audit.
